

Individual Report for MUSI-710-DL1-Analysis of Timbre – Megan Lavengood-Spring 2024

Project Title: **Student Evaluations of Teaching - Spring 2024**

Survey Audience: **15**

Responses Received: **5**

Response Ratio: **33.33%**

Report Comments

Student evaluations of teaching provide critical feedback to instructors that can be used to adjust and improve the class experience.

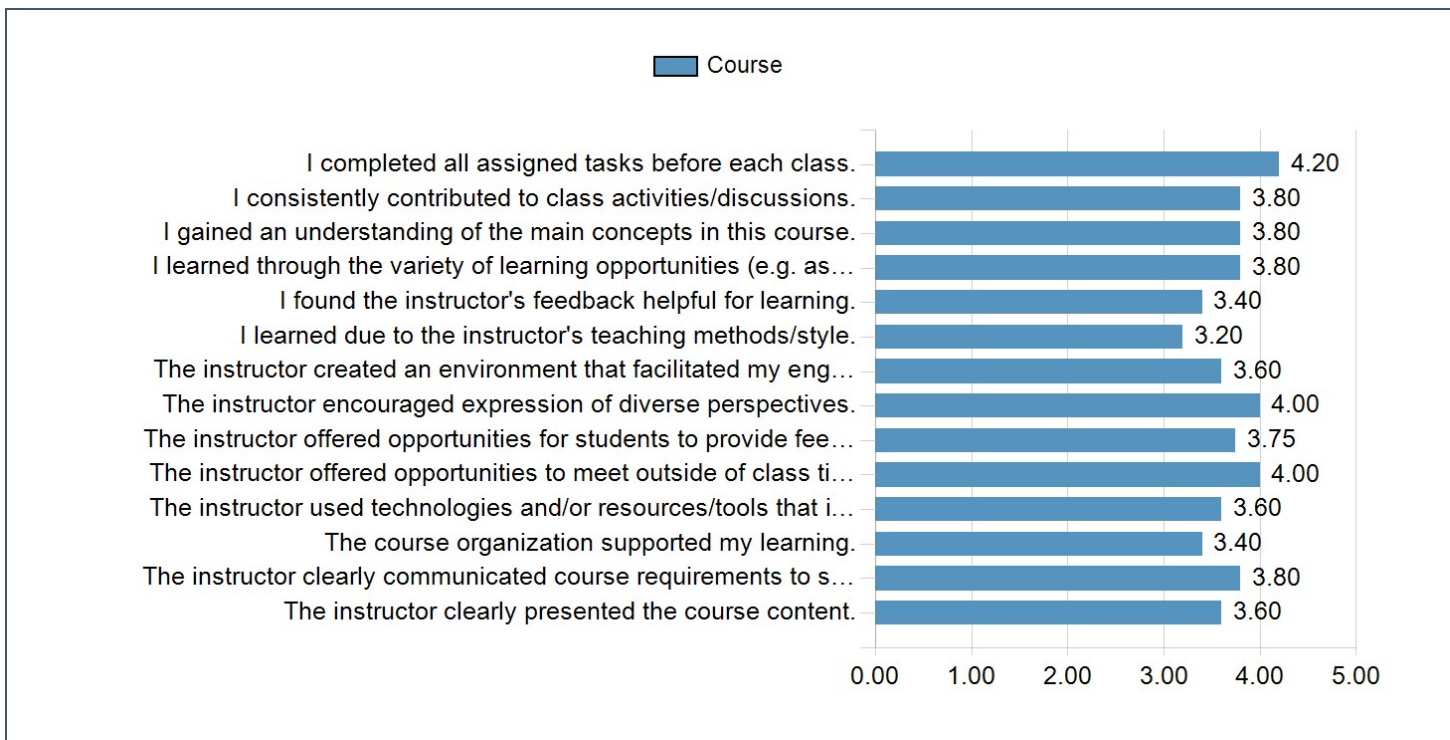

This information is also evaluated as part of performance reviews.

You are encouraged to review this information to learn more about the student perspective and experience.

If you have any questions about the process or how to interpret this information, please contact the Office of Institutional Effectiveness and Planning at oiepset@gmu.edu.

Were there any significant obstacles to learning that were beyond the control of the instructor (e.g., scheduling or technology problems, university closings, limitations caused by other students or by group dynamics)? If so, please explain.

Comments
Having this class late at night (7–10 PM) meant I was often quite tired by the end of class. It would be a better experience if it were even just one hour earlier.
There is no obstacle beyond the control of the instructor.

What 2-3 aspects of this course were most valuable to your learning experience?

Comments
The class was very cool and I learned some interesting things. I admire my professor and her teaching style. it was very structured and also had a lot of freedom.
The wide array of musical styles covered in this class gave me a holistic understanding of timbre analysis both inside and outside the classical tradition. All of the readings assigned were both interesting to discover and great examples of how to write my own analysis papers.
1. It is totally new area to my study. 2. The is course provide some new ideas to support my major study.

What 2-3 aspects of this course were least valuable to your learning experience?

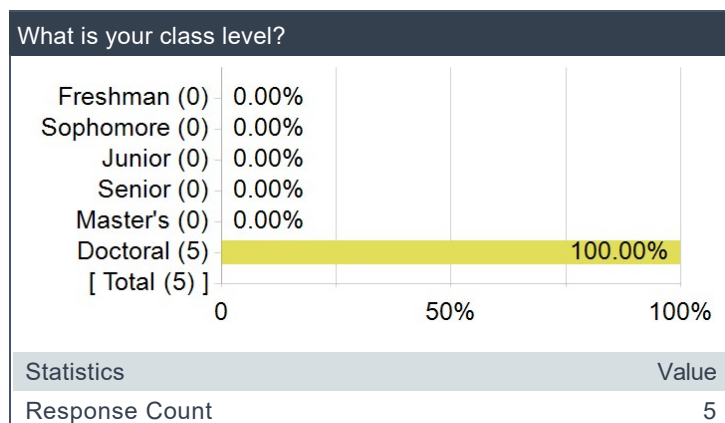

Comments
The online modality is unpleasant for me; something feels incongruous about attending a class at my desk. I would have felt a better sense of community with my colleagues if we had met in person. I also felt that our time with spectrogram analysis was rushed, and I didn't come away understanding as much as I would have liked.
1. The subject of the course is not closely related to my major. 2. The most of time in the course is just discuss between students, there is no clear direction and valuable information in this course.

What modifications do you suggest for the next time the course is taught?

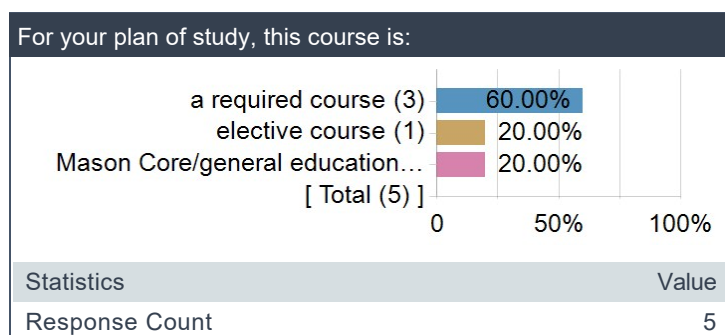

Comments
Hold the class in person, and spend maybe one extra week working with spectrograms and really understanding how to approach them.
Reducing requirements to final projects, there are too many works are unnecessary and it cost too much time.
